PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No.	Applicant(s)	
	10/534,610	MUELLER ET AL.	
	Examiner	Art Unit	
	Dameon E. Levi	2841	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10/23/2006(Restriction Election).
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) ¹⁹⁻³⁰~~1-30~~ is/are pending in the application.
- 4a) Of the above claim(s) ~~1-16~~ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 19-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

OK 4/13/07
OK 4/13/07

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11 May 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 19-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Porter
US Patent 5808866.**

Regarding claim 19, Porter discloses an assembly comprising:

plug-in measuring-device modules (elements 31, Figs 1A-5), which are connected via a plug-and-socket panel (elements 24, Figs 1A-5) to an information-output device (Fig 5) at a front side of the measuring device „wherein the measuring-device modules (elements 31, Figs 1A-5) can be plugged in from a rear side facing away from the information-output device, characterized in that a recess (Figs 1A-5) is provided in the front side of the measuring device , through which an electrical connection (elements 32, Figs 1A-5), at least for a part of the plugged-in measuring-device modules is accessible.

Regarding claim 20, Porter discloses characterized in that at least a part of the measuring-device module provides electrical contacts (elements 30, Figs 1A-5), which are accessible from the rear side of the measuring device.

Regarding claim 21, Porter discloses characterized in that for each measuring-device module to be accommodated, at least one guide component (elements 29, Figs 1A-5)for

the guidance of the measuring-device modules is provided, wherein the at least one guide component provides a resilient, deformable guide element for the resilient mounting of the measuring-device module. Regarding claim 22, Porter discloses characterized in that the guide components (elements 29, Figs 1A-5) for adjacent measuring-device modules are spaced at a distance such that a cooling-air gap is formed between adjacent measuring-device modules.

Regarding claim 23, Porter discloses characterized in that the resilient, deformable guide elements are formed by resilient tongues (14) arranged in a row (elements 29, Figs 1A-5).

Regarding claim 24, Porter discloses characterized in that the plug-and-socket panel (elements 24, Figs 1A-5) is mounted in such a manner that it can be displaced within a receiving device (elements 11, Figs 1A-5) in at least one plane perpendicular to the direction of insertion of the measuring-device modules.

Regarding claim 25, Porter discloses characterized in that, in order to retain the measuring-device modules, a rear cover (elements 39, Figs 1A-5) is provided for the measuring-device housing, which cover has at least one recess (elements 41, Figs 1A-5), through which connections of the measuring-device modules orientated towards the rear of the housing are accessible.

Regarding claim 26, Porter discloses characterized in that insertion elements (elements 34, Figs 1A-5) can be inserted into the cover of the measuring device housing in order to cover the cooling-air gaps between the measuring-device modules and/or blank elements.

Regarding claim 27, Porter discloses characterized in that each measuring-device module (elements 31, Figs 1A-5) is formed as a functional unit, and that data can be transferred via a bus system either between various measuring-device modules or to the information-output device.

Regarding claim 28, Porter discloses characterized in that the information-output device is designed as an input/output device(Fig 5).

Regarding claim 29, Porter discloses characterized in that at least one measuring-device module (elements 31, Figs 1A-5) is designed as a computer module for controlling data transfer via the bus system.

Regarding claim 30, Porter discloses characterized in that a plug-in power pack (elements 35, Figs 1A-5) is provided, which is also connected to the plug-and-socket panel (elements 24, Figs 1A-5) via an electrical plug-connection, wherein the power supply to the measuring-device modules is provided via the bus system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dameon E. Levi whose telephone number is (571) 272-2105. The examiner can normally be reached on Mon.-Thurs. (9:00 - 5:00) IFP, Fridays Telework.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on (571) 272-1984. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2841

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
